

[Document type] Abstract

[Abstract]

[Object]

To provide a data displaying method, a computer system, and a computer-readable recording medium.

[Constitution]

A data displaying method employed for a computer system that includes a computer means 2 with a database DB; display means 3; and pointer means 4 for entering a position on the screen of the display means 3. The method includes a step of reading data from the database DB and plotting the data on the screen of the display means 3 with respect to the first variable so as to plot a main graph; a step of deciding whether or not an input from the pointer means 4 is a request for plotting data related to the second variable; a step of deciding coordinate data of a position of the main graph displayed on the screen of the display means 3; and a step of searching the coordinate data from the database DB.
